(54) STORAGE CONTAINER FOR RECORDING MEDIUM

(57) Abstract:

PROBLEM TO BE SOLVED: To allow a first face of a piece to be simply attached to a lower face of a container body.

SOLUTION: A first face is attached to a lower face as follows. First, a swing wall 54 of a lateral wall 12 is put in a second state, a fourth face of a piece is inserted into a recessed groove 82, and the first face is aligned with the lower face.

Thus the lower face is covered by the first face, and a rim of a wide part of the piece is locked on a locking wall 64. Then the swing wall 54 of the lateral wall 12 is put into a first state. Thus the wide part of the piece is brought into the first state where it is covered by a lower face wall 60, and the first state is locked and held by engagement of a shaft 62 with a recessed groove 58. Thus the first face of the piece is attached to the lower face of a container body 4.
